

fotos - my web sites!

Visit one or more of my web sites. While some of the fotos may be duplicated each site has some unique info. Many of the sites are updated on a daily basis ... or at least weekly ... would you believe sometime! :)

25275.com index

25275.com is my website that allows me to build whatever ... I've found it very difficult to build sites that are easy to maintain. They all become out-of-date once I become interested in another project. The last index page was an attempt to develop a photo album. One feature that I carried over from other indexes is the "What is the heck is 25275?" Check it out, I know you are dying to know!

flickr.com

I add up to four fotos per day. Many different subjects: flowers, animals, buildings, etc. I have been most faithful to this site. Check this site first!

fotobydave's gigapans

The gigapan is a huge panorama. This site provides a list of the gigapan's prepared by me.

slide.com by fotobydave

Multiple slide shows prepared by slide.com. A verticle slide.com slide show is shown on the left.

Dave's Rant & Rave

- Discussions on subject that either tick me off or make me happy!
This site gets updated from time to time without any regularity. I keep promising to add it more frequently but never seem to become moved!

old sites

[Get Your Own!](#) | [View Slideshow](#)

phanfare photos by fotobydave

full screen slide show with music. This website will be phase out - it is no longer free for me! So I will move everything to Picasa.... someday!

fotopic.net

Foto shoots at ball games, concerts and other activities. Main index describes each activity. Sign up for the email update. You will be sent an email each time the site is updated. Updates are normally completed within a few hours after the activiy ends.

word by dave

A mixture of subjects and techniques. Powered by "WordPress" and hosted on POWWEB.com. Of special interest is the collection of photos from flickr photographers.
